

Dear Parent,

Subsequent to multiple pilots conducted at our BLR chapter we recommend this ThirdLeap Artificial Intelligence Teaching Machine Math's LAB. The following are the Unique Salient Points and Features Advantages and Benefits:

### Acute Problem:

Everywhere in the world, most of the students struggle in solving Math problems and cannot apply basic concepts, taught over the years, to solve these problems. They especially become frustrated and lose confidence in their learning ability when they are doing their homework and do not have immediate help once they get stuck.

### Solution:

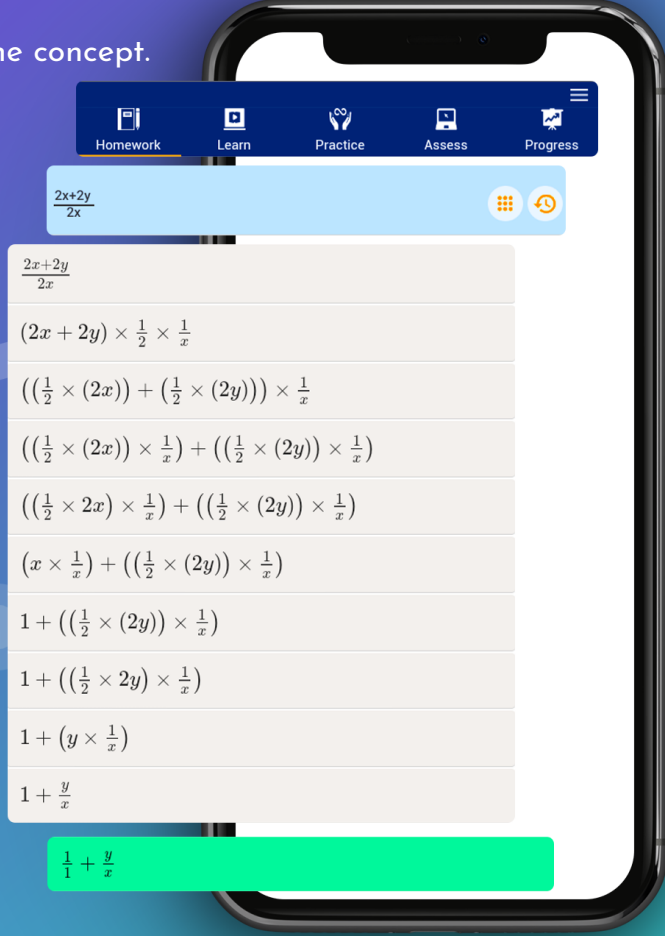

"ThirdLeap Math" is like your own personal Math Teacher and it is available whenever and wherever you need, because it is powered by ThirdLeap's cutting edge Artificial Intelligence reasoning engine. All this you can do it by using multiple input styles, whether it is Keyboard or Stylus. (to feel like you are using pen and paper to write the solution).

LEARN a concept by watching a video associated with the concept.

You choose the concept you want to learn. It will show you the video from that concept. ThirdLeap's cutting edge Artificial Intelligence reasoning engine.

ASK for help on a problem. It will show you step-by-step solutions on your problem. You can enter the problem in the "Homework" panel. You can either try each step yourself or ask for hint or ask to show next step.

## PRACTICE

A number of increasingly difficult problems to master a concept.

Once you pick the concept you want to learn, it will generate problems for you.

Again for each problem you can either try each step, ask for hint, or next step.

## FEEDBACK

Feed Back on each step that you enter:

It tells you right away whether the next step you entered is right or not.

You can try to enter the step again or get hint or reveal

## ASSESSMENT

Assessments test to see how well you have understood the concept.

You can enter multiple steps or final answer in the assessments

You can review your performance - the step and the problem you went wrong.

TRACK your performance over time to see how you have improved.

You can track your concept level performance

You can also track your weekly activities

REWARDS you for learning, practicing, and taking assessments against your goals.

**ThirdLeap Math is based on Artificial Intelligence. It behaves like a Math Teacher in following ways:**

- 1) It can SOLVE large class of problems.
- 2) If a problem can be solved in multiple ways, it will give you MULTIPLE SOLUTIONS  
This might help you pick your favorite way of solving the problem.
- 3) It LEARNS what concepts you are good at and which concepts you need help with.
- 4) It RECOMMENDS the next concept you should be learning
- 5)It ADAPTS the next problem that is best suited for you to solve for efficient learning

**ThirdLeap Maths provides:**

Homework helper

Step-by-step auto correction and feedback.

Detailed step-by-step solution.

Step level Hints.

Powerful Math Keyboard

### Specialties:

AI Engine  
Learn To Think  
Teacher following Student approach  
Adaptive learning  
Selective teaching  
Stylus to Write

This app can be downloaded from play store on your smart phone with the key words "third leap math". It costs 40\$, but you NEED NOT pay that. GIIS will give it to you at an extremely nominal cost. All you need to do is confirm back that you want it for your child.

**Warm Regards**  
GIIS Management

## THE WORLD'S MOST AWARDED SCHOOL

Attested in 2015 by Global Benchmarking Network, Germany for overall "Organisational Excellence".

**8** IB World Toppers

**OVER 100** International & National Awards for Education Excellence

**WORLD'S TOP 20** Universities accept GIIS graduates
